STATISTICAL VITAL RATES FORMULAE

Crude Birth Rate (CBR)	$= \frac{\text{No. of Live Births which occurred in a given geographical area during a given year}}{\text{Mid year estimated population of the same area during the same year}} \times 1000$
------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Crude Death Rate (CDR)	$= \frac{\text{No. of Deaths which occurred in a given geographical area during a given year}}{\text{Mid year estimated population of the same area during the same year}} \times 1000$
------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Infant Mortality Rate (IMR)	$= \frac{\text{No. of Deaths under one year of age which occurred among the population of a given area during a given year}}{\text{No. of Live Births which occurred among the population of the same area during the same year}} \times 1000$
-----------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Still Birth Rate (SBR)	$= \frac{\text{No. of Still Births which occurred in a given geographical area during a given year}}{\text{Total No. of Delivery (Live Birth + Still Birth) of the same geographical area during the same year}} \times 1000$
------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Maternal Mortality Ratio (MMR)	$= \frac{\text{Total No. of woman who die as a result of pregnancy and child birth complications}}{\text{Total No. of Live Births in a given year}} \times 100000$
--------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------

Age Specific Fertility Rate (ASFR)	$= \frac{\text{No. of Live Births to the mothers of a specific age group of population in a given geographical area during the given year}}{\text{Mid year female population of the specified age group in the given area during the same year}} \times 1000$
------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Total Fertility Rate (TFR) (Where the age grouping is in class interval of 5 years)	$= \frac{5 \times \text{summation of ASFR}}{1000}$
----------------------------------------------------------------------------------------	----------------------------------------------------

% of HOB	$= \frac{\text{No. of Live Births 3 and above}}{\text{Total No. of Live Births}} \times 100$
----------	----------------------------------------------------------------------------------------------
