VITAMIN -A ADMINISTRATION IN TAMILNADU

The National Programme for the control of blindness due to VITAMIN-A DEFICIENCY covers the children in the age group of 6 months to 36 months. In TamilNadu, the programme has an extended coverage of

children in the age group of 6 months to 60 months. The target group is about 67.20 lakhs children. Each child is administered with two doses (2ml per dose) of Vitamin A at an interval of 6 months. One dose is administered during July and another dose is administered during February every year. The Programme for the administration of Vitamin-A to the children in the age group 6-60 months is organized on Campaign basis. The administration of Vitamin-A doses is done by the Village Health Nurses through Anganwadi Workers, ASHA, Volunteers etc.

Also, the programme for administration of one dose of Vitamin-A solution to post natal lactating mothers to take care of children under 6 months of age has been taken up from 2004-05 under Part-II scheme and 24,000 bottles (12 lakhs doses) have been supplied through TNMSC to the Deputy Directors of Health Services.

DRUG SUPPLY LOGISTICS

Earlier up to 1999-2000, Government of India supplied drug kits to 8682 Health Sub Centres and 3271 urban health posts once in 6 months. In each drug kit, 6 bottles (600 ml) Vitamin A solution is included. Thereafter supply of drug kit was decentralized and the supply was effected through Reproductive and Child Health Programme.

For the year 2005-06, UNICEF supplied 2,60,000 bottles (1,30,00,000 doses) of Vitamin A solution for administration to children. And, for administration to post natal mothers, 24,000 bottles of Vitamin-A solution is procured under Part-II scheme through TNMSC.

For the year 2006-07, for administration to children, 2,82,243 bottles of Vitamin A solution have been procured and for postnatal mothers 24,000 bottles were procured under Part II scheme through TNMSC.

For the year 2007-08, for the administration of Vitamin A solution 57,019 bottles is procured through TNMSC.

6.2. Dr.MUTHULAKSHMI REDDY MATERNITY BENEFIT SCHEME - 2008-09

Government of TamilNadu is committed to the health and welfare of the women and children particularly the poor and vulnerable. Therefore, the State Government with a view to provide financial assistance to poor pregnant women launched Dr. Muthulakshmi Reddy Maternity Benefit Scheme on 15.9.2006. Under this scheme Rs.3,000/- is given to the poor mother three months prior to the expected date of delivery and Rs.3,000/- after delivery. Srilankan Refugee beneficiaries are also eligible to receive the benefit. Pregnant women who have membership card under TamilNadu Agricultural Labourers - Farmers (Social Security and Welfare) Scheme are also provided the cash assistance.

This cash assistance is given for compensation of the wage losses incurred, to get good nutritious food and to meet the incidental cost of child birth and child care. All pregnant women living below poverty line are eligible to receive the benefit for two deliveries.

From 15.9.2006 to 31.3.2007 a total of Rs.100 Crores have been distributed to 2,41,095 beneficiaries. For the year 2007-08 the budget provision of Rs 300.0 crores has been sanctioned and 6,79,831 number of pregnant women were benefited. The budget provision of Rs 350.0 crores has been sanctioned for the year 2008-09 and 5,79,821 number of pregnant women were provided with cash assistance. A budget of Rs.250 Crores have been allotted for the year 2009-10.

6.4. CONTROL OF ANAEMIA AMONG ADOLESCENT GIRLS

Anaemia is a condition in which haemoglobin content in our red blood cells is less for which the micronutrient iron is responsible.

AGE / SEX	Required level of Haemoglobin (in 100 ml blood)
1. Children - 6 months – 5 years age - 6 years – 14 years age	11 gm 12 gm
2. Adults - Male - Female - Pregnants	13 gm 12 gm 11 gm

Anaemia may be caused due to

- Loss of blood, since puberty, due to menstruation every month
- Loss of blood during delivery
- less in take of food containing iron or less absorption of iron content.
- infection like malaria, worm infestation or other prolonged infections.
- intake of certain drugs or chemicals.
- conditions like cancer.

However, poor intake of locally readily available food stuff containing iron, ignorance, certain food taboos, worm infestation due to unsanitary condition are the common prevailing situation which can be changed through nutrition, education, counseling on personal hygiene and environmental sanitation.

Anaemia can be easily detected by looking at pallor tongue, eye lid, nail beds and swelling of feet, face etc., feeling tiredness, breathlessness for normal household work will suggest condition for anaemia.

Adolescent girls (11-19 yrs) constitute 7.7% of state population (Census 2001).

As per NFHS III Survey (2005-06), Ever-married women aged 15-49 who are anaemic are 53.3%. But ever-married men aged 15-49 who are anaemic are only 16.6%.

Even though it affects every section of the community, women are affected more. Because, a girl child

- Getting lesser share of food in the family.
- Living in unsanitary conditions leading to hook worm infections with the neglect of medical care.

- Menstrual loss due to adolescent period.
- Early and repeated pregnancies leading to further depletion of iron store, thus resulting in pregnancy wastage, low birth weight babies, bleeding during delivery resulting to anaemia or death.

Menstrual disorder leading to anaemia

Anaemia in women has international impact and hence control of anaemia in women and adolescent girls becomes the urgent need being the silent killer in women and child.

Administering iron tablet and nutrition counseling during pregnancy alone will not yield the desired result. Moreover 24% of the pregnancies occur among adolescent girls hence, the early intervention of anaemia control among adolescent girls is a need of the hour.

Hence, to improve the Haemoglobin level among adolescent girls, all adolescent girls are given one IFA Large tablet on every Thursday by the Link Volunteer.

Haemoglobin level is tested before entering into the scheme and once in 6 months after consumption of the tablets.
