Hiring the services of a Agency to print, replicate and deploy Behaviour Change Communication (BCC) print materials on programmes such as Cardio vascular Diseases prevention (CVD), Cervical Cancer screening and treatment, CEmONC and tribal health initiatives implemented by Tamil Nadu Health Systems Project (TNHSP) .

1. Background

The Tamil Nadu Health Systems Project (TNHSP) is being implemented in Tamil Nadu from January 2005 with the financial assistance from the International Development Association. The primary focus of the project is to strengthen the secondary level health facilities in providing quality health care services to the poor thereby reducing the mortality, morbidity and disability especially in the areas of maternal and child health, tribal health and non communicable diseases.

Important activities of the project amongst various others include,

1. Strengthening of 24 hours Comprehensive Emergency Obstetric and Newborn Care (CEmONC) Centres and creating a demand for the services amongst the population
2. Tribal Health Development Initiatives
3. Creating awareness about Cardiovascular Diseases and Diabetes Mellitus and its predisposing risk factors through sensitization campaigns and to bring about life style and behaviour modification among various target groups and to prevent the risks of Cervical and breast Cancer in the state of Tamil Nadu through awareness generation and provision of screening , and treatment services.

a. Strengthening of CEmONC Centres

The birth rate of Tamil Nadu is 16.5 with an infant mortality rate of 37 per 1000 live births and a maternal mortality rate of 92 per one lakh live births. This is so low in comparison with the other states of India, but still higher than the developed countries of the world. Over the years, Government has been striving hard to improve maternal care and thereby reduce maternal mortality. Considering all maternal deaths, 75% of them occur during the natal and post natal period. One fifth of these deaths occur during transit towards the nearest health facility. Further reduction in the maternal mortality rate in the state would depend crucially on the provision of quality emergency obstetric services. The Government of Tamil Nadu has therefore established 24 hours comprehensive emergency, maternity, obstetric and newborn care services (CEmONC) in 62 district and sub district hospitals and 15 medical college hospitals in Phase I and 32 more centres in phase II to provide definite and quality services to any woman in labour without referring to another hospital These hospitals were selected in such a way that the pregnant mother would not have to travel more than 30 minutes to one hour to reach a CEmONC Centre. The CEmONC Centre is equipped with both manpower and the infrastructure required to take care of the mother and the new born. Round the clock, the centre has Obstetricians, Paediatricians, Doctors, Staff Nurses, Lab Technicians, and support staff on duty and Anaesthetists on call. Intensive inputs were provided, in terms of training and physical infrastructure to ensure quality care. Doctors and nurses positions have been sanctioned and posted exclusively for CEmONC services in addition to the existing doctors and nurses.

The centres are equipped with a fully functional maternity block, including a labour ward, operation theatre, blood bank / storage unit, new born ward, new born intensive care unit (NICU) and isolation ward. Yet, the challenge remains in creating a demand for the usage of the services .This can be achieved only through a suitable communication campaign.

b. Tribal Health Development

In Tamil Nadu, the tribal population of 6.24 lakhs live scattered in all districts and predominately live in 13 districts which are hilly and difficult terrain. Initial studies have indicated that the tribal population in the Tamil Nadu have considerably poor health outcome than the non-tribal population and the utilization of health services is also low among this population. Years of work among the tribals have made the NGOs to have a very good understanding of the reasons for the low utilization and limited access. The efforts put in by the Non Governmental Organizations (NGOs) to offer health care services through the available infrastructure & manpower are not able to reach the tribal due to various operational /logistics problems in the tribal regions. Thus the health status of these people has not improved compared to the people living in plains. This stands as a stumbling block in improving the overall health indicators of the State.

In order to address this the Government of Tamil Nadu had initiated the tribal health project through TNHSP to improve the health status of people of Tamil Nadu by utilizing the existing secondary care services in the State. The following activities are now being implemented by TNHSP utilizing the World Bank assisted funds

Tribal Outreach Services

Under the tribal health outreach services, 12 mobile outreach vans have been provided. The mobile outreach van has a medical team consisting of one Medical officer, a Staff Nurse, one Auxiliary Nurse Midwife (ANM), a lab technician and a driver. The outreach services are operated by NGOs through a Public private partnership (PPP) model. From 2008 to August 2011 total of 878502 out patients are examined through the tribal mobile outreach services

Bed grant of NGO hospitals

Though the public health care facilities in the tribal areas have adequate infrastructure and manpower, the OP strength and the bed occupancy utilization is very low. The tribal population is attracted by the services that are provided by the committed NGOs since these are nearer to them. Inorder to support / encourage the services provided by the NGOs the bed grant scheme was sanctioned to provide inpatient services for the tribal population. This is done in two NGO run hospitals as a pilot programme. All costs associated with inpatient care for the tribals are reimbursed.

Sickle Cell Anemia Intervention Programme

Sickle cell anemia is common among the primitive tribes of Nilgiris district and therefore the Sickle Cell Anemia intervention programme aimed at prevention, screening, detection and treatment of sickle cell disease is being implemented as a pilot through two NGO run hospitals supported by TNHSP.

The programme was implemented from November 2007. It till August 2011 around 35,000 tribal population were screened in Gudalur and Pandalur blocks of Nilgiris district. About 199 positive cases were detected and the positive cases were given treatment for minor ailments and also IP treatment. They were also given vitamin and iron tablets along with hydroxy urea tablets. The positive children were given pencillin prophulaxis and pneumococcal vaccination. Counselling including premarital counselling were given. The response to the programme is very encouraging and this activity needs to be sustained beyond the project period.

Ante Natal mothers stay plan in PHCs

Most of the Tribal Inhabitation are at very remote areas hence, the Primary Health Centres (PHCs) are not easily accessible to them. Further because of the myths and misconceptions that are prevalent in the tribal population the number of Ante natal mothers utilizing the PHCs for delivery is very low. To address this a pilot programme was implemented by Tamil Nadu Health Systems Project in the following four primary health centres where expectant mothers are brought in from their place of residence to a PHC, three days before their expected delivery date.

District	Primary Health Centers
Salem	Valavanthi
Namakkal	Valavanthinadu
Dharmapuri	Kottaipatti
Vellore	Pudunadu

The cost of shelter, medical attention, and food is taken care of by the state for the mother and an attender. This is expanded shortly to all tribal districts through the National Rural Health Mission. At present the programme is implemented in 20 PHCs of the state.

Counseling service in tribal PHCs & Hospitals

TNHSP is implementing many tribal health initiatives to improve the health status of the tribals living in remote tribal areas. In spite of the availability of well organised primary and secondary healthcare services the tribals are hesitant to go to these institutions under the assumption that the health care providers do not have the sympathy and attention for them.

Hence it was decided to create a link between the tribal community and service providers of these institutions by engaging a link person selected from the tribal community as counselors. These counselors were trained in counseling services and put into service in 25 Government Hospitals and 5 PHCs as a pilot initiative. Their services are proved to be effective and are appreciated by the tribals as well as the service providers. At present there are 30 tribal counselors in the tribal districts. Totally 7,82,702 patients were counseled from March 2008 till August 2011.

All the above activities are upscaled during the extended phase of the project. 8 more mobile outreach services and screening of hill tribes in Jawadu district of Vellore district for screening Sickle Cell Anemia/ Thalasseemia are addtions to the existing programme. Also two more NGO hospitals

under Bed grants scheme and tribal Counsellors have been added during the Additional financing period of the project.

Inspite of the above efforts, the utilization of health care services by the tribal population is still very low. So, now it is essential to implement a Behavior Change Communication (BCC) campaign through print media materials to create awareness on the health facilities available to them at their doorstep and utilize the same effectively.

c. Cardio Vascular Diseases and Diabetes mellitus prevention & screening and treatment of Cervical and breast cancer:

Over the last few decades, Tamil Nadu has made considerable progress in health care activities. The disease burden to communicable disease has been reduced largely. However, the non – communicable diseases, especially cardiovascular disease (CVD), diabetes mellitus, various cancers etc are showing an increasing trend. Among the non communicable diseases, chronic disease like Cardiovascular diseases, cancer, respiratory diseases and diabetes account for high morbidity and mortality with an increasing trend in the developing countries.

In India, Cardiovascular Disease (CVD) is the largest cause of death and disability. By 2020, 2.6 million Indians are predicted to die due to coronary heart disease, which constitutes 54.1% of all CVD deaths. Nearly, 50% of these deaths are likely to occur among the productive young / middle age group, which will have a negative bearing on the Indian economy.

The Tamil Nadu Health Systems ensures quality healthcare through risk factor reduction for Cardiovascular Diseases. The pilot programme done in two districts of Virudhunagar and Sivaganga were aimed at creating awareness about CVD and its predisposing risk factors through sensitization campaigns and to bring about life style and behaviour modification in the target group. Specific BCC interventions such as formation of heartclubs, organising of competitions and rallies in schools, sensitisation programmes, group meetings, rallies, heartmelas, information of village heart clubs in the community and specific lecture sessions, were means of interventions addressed for the various target groups. In addition Information Education and Communication (IEC) in the form of print, indoor and outdoor displays and mass media was done in the pilot districts to create awareness on the various factors causing CVD and to create a life style modification among individuals above the age of 30 years.

The Incidence of cervical cancer is very high in Tamil Nadu. It is the most common cancer occurring in Women. 80% of the population living in rural areas is at high risk due to low socio economic status, poor genital hygiene, and early marriage, lack of knowledge about their health status and availability of facilities. Early detection, screening and treatment are key factors to prevent the risks for cervical cancer.

Specific intervention is at two levels viz. Primary prevention and secondary prevention. Primary prevention is aimed at community-based interventions such as

- ❖ Awareness generation on risk factors for cancer cervix among the women through group meetings, Interpersonal communication, and mass media communication.

- ❖ Awareness among doctors and paramedical personnel.
- ❖ Awareness among couples.
- ❖ Secondary prevention is aimed at screening for early detection, referral and management.

The project has implemented a pilot on screening women within the age group of 30 to 60 years for cervical cancer using Visual Inspection with Acetic acid (VIA) and Visual Inspection with Lugols Iodine (VILI) on a very large scale for last three years. This pilot was implemented in two districts of TamilNadu, Thanjavur and Theni since Nov 2006. IEC messages for women above 30 years of age was given in the form of print, indoor and outdoor materials and mass media

Coverage in the CVD pilot districts

- ❖ In the school based interventions, 19000 students of Standard VII - IX from 25 schools in each of the two pilot districts were sensitized with messages on CVD risk factors and its prevention through awareness programs like Junior heart clubs, Heart Melas on 'Avoidance of Risk factors' etc.
- ❖ Work place intervention included sensitisation of 3441 employees in ten workplaces (five in each district)
- ❖ At Community level, 4,55,145 individuals had IEC interventions through various approaches like group meetings, rallies, heart melas, bus hoardings, radio broadcasts etc.
- ❖ 12,31,259 individuals were screened for Hypertension in Sivaganga and Virudunagar districts in the Clinic based intervention. Among those screened, 77,757 newly detected cases of hypertension were investigated and put on treatment and followed-up regularly. Counselling on life style modification were provided to all screened individuals and newly detected patients.

Coverage in the Cervical Cancer pilot districts

- ❖ 1,96,559 women in Theni district and 2,91,525 women in Thanjavur district were screened for Cervical Cancer using VIA / VILI technique.
- ❖ Among those screened, 5090 women from Theni and 15743 women from Thanjavur were found positive in the primary screening and referred for confirmation by Colposcopy examination.
- ❖ 241 women from Theni and 942 women from Thanjavur were confirmed for Cervical Cancer.
- ❖ 76 women from Theni and 517 women from Thanjavur were treated for cervical cancer.

Lessons learnt

- ❖ This innovative pilot approach to combat Hypertension and Cervical Cancer was first of its kind in the country to cover a fairly large population
- ❖ The comprehensive approach by creating awareness on risk factors, screening, diagnosis, treatment and follow-up of individuals with Hypertension / Cervical Cancer have yielded appreciable results and opened the way for replicating it in other districts
- ❖ The cost analysis shows that the screening and treatment program for hypertension / Cervical Cancer is relatively inexpensive in terms of cost per person screened and treated. The unit recurring costs for Hypertension were Rs.28 per person screened and Rs.883 per person treated: the unit recurring cost for screening a woman for Cervical Cancer was Rs.102.
- ❖ The investment made on screening is very negligible when compared to huge expenditures which may be incurred for treating full blown cases.

Up-scaling NCD interventions in Tamil Nadu

Though communicable and Non-Communicable diseases pose a dual economic burden on the state, Non-Communicable diseases such as Hypertension, Diabetes Mellitus, Breast and Cervical Cancers, if not addressed by way of suitable interventions, would cost the health systems a huge expenditure later for treating the diseased at advanced stage of illness.

As the Pilot experience proved as an effective & feasible model, Tamil Nadu Health Systems Project proposed to scale up the activities along with additional interventions for Diabetes Mellitus and Breast cancer during 2011- 2013 for the target population as detailed below;

- ❖ Prevention and treatment of Hypertension (HT) & Diabetes Mellitus (DM) among 30 years and above men & women.
- ❖ Screening and treatment of Cervical & Breast cancer among 30 years and above women.

The objective of the programme on hypertension and diabetes mellitus is to reduce morbidity and mortality due to hypertension and diabetes mellitus through:-

- ❖ Creating awareness through Behavioral Change Communication (BCC) and bring about Life Style Modification (LSM).- Primordial Prevention
- ❖ Screening for early detection of Hypertension and Diabetes Mellitus - Primary Prevention
- ❖ Treatment of Hypertension and Diabetes Mellitus - Secondary Prevention.
- ❖ Timely detection and treatment of complications.

The main objectives of this programme on cervical and breast cancer are:

- ❖ To create awareness in the community on the risk factors, symptoms, benefits of regular screening and early detection, services available and the facilities providing the services for screening and treatment of cervical and breast cancer and to specifically inculcate periodical Breast Self Examination (BSE) among women in the community.
- ❖ To motivate, counsel and screen women of 30 years and above visiting the health facility for both cancers irrespective of presence of any symptoms
- ❖ To refer all screened positive women for further evaluation, confirmation and treatment if required.
- ❖ To ensure that medical and para medical personnel in the health facilities uniformly adopt the approved screening and treatment protocol.

The up scaling of implementation in rest of the districts is planned in a phased manner as detailed below:

While a national database on NCD is still far from reality, only few Private health care institutions providing NCD interventions maintain some sort of registry for their cohort of patients. Against this background, the Upscaling of the programme will provide for the first time in India, a population cum hospital based data for a large number of patients registered for screening, treatment and follow- up over years. The registration of Cervical and Breast cancer patients would serve a good base for the Cancer Registry system as well.

The department of health and family welfare has planned the implementation of NCD programme in Co-ordination with other departments like Education, Labour, Rural, Municipal Administration & Corporation and ESI so that respective target populations get covered in a holistic manner.

Co-ordination with other departments

In the up-scaling programme, in addition to implementing the NCD programme in the three tiers of health system namely DPH, DMS and DME, it is planned to involve other departments like Education, Rural Development, Labour, ESI and Municipal administration to reach out various groups in the community thus ensuring best results. These departments are eminently placed to support the TNHSP in realizing the desired objective of NCD control in the state and making a difference in the lives of the people. The partnerships would leverage on the strengths of the respective departments in the implementation services of the NCD programme.

School based interventions

The risk of cardiovascular disease among young adults is increasing substantially and it is very important that the school students understand the implications due to Non –Communicable Diseases (NCD) and the importance of prevention. It is very important that the adolescent age group do not acquire habits such as smoking, alcohol intake during their adolescence and it is the right time to cultivate in them healthy life style practices like adequate physical activity, eating healthy food etc. Through dissemination of key messages, school children can learn about the gravity of the problem and adapt positive behavior practices. School children who are sensitized become ambassadors of change and spread message on the prevention of NCDs to their parents and community especially in rural areas.

The Tamil Nadu Health Systems Project initially piloted Cardio-Vascular Prevention and Treatment Programme in Virudunagar and Sivaganga districts. The school based intervention in the pilot project aimed at creating awareness among 19000 Students.

In up scaling the NCD program to other districts in Tamil Nadu, the Tamil Nadu Health Systems Project has initiated the activities in co ordination with the School education department covering about 17,000 schools that includes the middle and higher secondary schools. A nodal officer in the rank of Joint Director of school education has been identified at the state level to coordinate the activities with the Project Management Unit of TNHSP. At the district level, Inspector of school will monitor the implementation of the intervention in the schools.

Chapters on non-communicable diseases and their prevention have been incorporated for Standards (VI – IX) on the following themes;

- ❖ VI std – Risk factors of heart disease
- ❖ VII std – Diabetes Mellitus, importance of physical activity
- ❖ VIII std- Hazards of smoking & healthy eating
- ❖ IX std – effects of smoking on various parts of human body, obesity and healthy life style.

The school based interventions would focus on the following activities;

- ❖ Develop communication materials on CVDs and the best communication material would be selected and awarded prizes at district and state level.
- ❖ To display communication materials on CVD, Diabetes and ill-effects of smoking, organize exhibitions / rallies and conduct quiz competitions
- ❖ To use Parent Teacher Association meetings and morning assemblies to communicate messages on the CVD, diabetes, smoking and their prevention
- ❖ The members of the Health Clubs formed at schools would undertake activities like discouraging the students from consumption of fried and unhealthy foods from the shops near the schools and advocate with the nearby shopkeepers / canteen not to sell cigarettes & fried foods to children.
- ❖ Encourage students to communicate on the ill effects of smoking and NCDs to their peer groups and also take messages to their parents & relatives on the need to reduce salt consumption & avoid reuse of oil for frying.
- ❖ Invite doctors from nearby hospitals / PHC's to talk on issues of health, specifically on CVD, diabetes and smoking

Workplace based interventions

There is high prevalence of risk factors for Cardio Vascular Diseases (CVD) such as obesity, sedentary life style, smoking, stress, poor physical activity, difficulty in accessing healthy food etc.. Studies conducted among industrial workers and in the baseline survey conducted in 2006 by Tamil Nadu Health Systems Project among the workforce also point out towards this.

A large number of the workforce suffers from Obesity, Diabetes Mellitus Hypertension, and CVDs. Most of the workers take food in the eateries in their factories or industries where the right dietary practices may not be followed.

Hence, the Tamil Nadu Health Systems Project has planned to implement workplace based NCD interventions among the workforce in co-ordination with the department of Labor. A nodal officer has been identified at the state level from the office of Commissioner of Labor to coordinate the implementation of the NCD program among the workforce.

The key objectives for the workplace based interventions are;

- ❖ To create awareness among the workforce on the risk factors related to NCD and its prevention & treatment aspects
- ❖ To inculcate healthy practices like promotion of physical activity, bringing necessary dietary practices in the eateries in workplaces etc.. with the aim to prevent emergence or development of risk factors for NCD
- ❖ To encourage the employer, employees and their families to go for screening for Diabetes Mellitus, Hypertension, Cervical and Breast cancer in the nearby health facilities like Primary Health Centre / Government Hospital / Medical college hospital / ESI dispensaries & hospitals / selected Municipal dispensaries & hospitals

The labor department has State and District frame. The state headquarters is at Chennai headed by the Commissioner of Labor with 17 Unorganized Workers Welfare Boards functioning under it. There are four Zonal level Joint / Additional Commissioners at Coimbatore, Trichy, Madurai and Chennai and Regional level Joint Commissioners for Chennai, Coimbatore, Trichy, Salem, Madurai, Tirunelveli, Coonoor and Dindigul regions

Within the district frame, there is unorganized sector which are registered as labor unions and other group falling under shops and establishments. Besides, there are plantation laborers who come under a board. At the district level, there is a District Labor Welfare Officer. There is also a labor division under Government of India in Chennai headed by Chief Labor Commissioner which covers all public sector undertakings including banking sector.

The key activities planned are:

- ❖ State level sensitization of officials and staff from the department of Labor and from the Confederation of Indian Industries (CII).
- ❖ Contracting an agency for the implementation of activities in the industrial units, factories, and establishments in the state for conducting the advocacy meetings with the labor union members across the state.
- ❖ Formation of Heart Clubs in workplaces
- ❖ Bringing changes in the dietary practices in the eateries and smoke free environment in work establishments
- ❖ Sharing IEC materials on NCD for display at workplaces.

Community based initiatives for mobilization of target beneficiaries

The success of the four important NCD interventions depends on the creation of awareness in the community by field workers so that the target population gets sensitized and report at the health facilities to benefit from interventions.

In this regard, it would be appropriate to reach out to the wide network of Self Help Group (SHG) women across the state of Tamil Nadu. The wide network of SHG members and their families would be a very important group among the beneficiaries of this programme.

The SHGs provide an excellent forum to disseminate the knowledge and information to their own families and those in the community. It is intended to tap their potential to address the larger community as well. This would be accomplished through a set of activities detailed below:-

- ❖ The Community Professionals (CP) of Vazhndu Kattuvom Project (VKP) / Community Resource Persons (CRP) of Women's Development Corporation of the Rural Development department are the resource persons who have been identified to sensitise the SHG women. The CPs / CRPs would be initially trained on the NCD interventions.
- ❖ The CPs & CRPs (6500) will in turn sensitize the SHG members on the NCD interventions for a maximum of six days in a month. One CP / CRP will cover two panchayat blocks in a district.
- ❖ In addition to the target population, CPs / CRPs will also take opportunity to sensitize individuals at National Rural Employment Guarantee Act work sites (NREGA), large construction sites and other large gatherings such as fairs, temple festivals or any other large event such as SHGs conventions etc.,
- ❖ Dissemination of IEC messages by CPs/ CRPs through hand outs, flip books, posters etc.
- ❖ The SHG members will also coordinate with local Village Health Nurses (VHN) to mobilize the community for taking the benefits of intervention.

In spite of the above measures there is a strong need to create awareness on large scale and also to reinforce the messages in the community. Thus an awareness creation through BCC print materials and through audio visual materials is essential to create behavior change.

Any claims by the Supplier for adjustment under this Clause must be asserted within twenty-eight (28) days from the date of the Supplier's receipt of the Purchaser's change order.
